

Designplus

Integration of Design and Science: Light, Materials, Colour and Environment

Symposium and Research Networking Event

Wednesday 24th June 2009, 9.00 – 17.00
RIBA, 66, Portland Place, London, W1B 1AD

**Hosted by the Design Research Centre (DRC),
DesignPlus at Kingston University, London and
Colour Group Great Britain.**

The symposium will highlight recent and innovative work in light, materials and colour related to design, technology and the environment. The talks and posters overlap these themes, harnessing current ideas and investigations. These will include issues of inclusive and sensory design within the built environment, social responsibility of design and the role of beauty, comfort and confidence in serving and engaging users of environments. There will be a display of posters from international researchers covering the overall theme of integration of design and science.

The event is the second in the series of Integration of Design and Science events and brings together researchers, artists, designers and practitioners. Speakers include Vibeke Riisberg, Designskolen Kolding, Denmark, Martin Richman, artist, London, Rachel Wingfield, loop.ph Ltd. and University of the Arts, London, Áron Losonczi, Litracon Bt., Hungary, Amanda Russell, Dr Stephen Pretlove, Archilab, Jakki Dehn Creative Resource, Professor Hilary Dalke and Dr Anke Jakob, Kingston University.
